GREEN
Tech MINI
CONFERENCE

TRAINING MODULES TO MOVE THE ENERGY TRANSITION FORWARD

GREEN
Tech

ATTEND LIVE
OR ONLINE

10:00 - 12:30

THE GREEN VILLAGE, TU DELFT

DELFT, THE NETHERLANDS
OR MICROSOFT TEAMS

10:00 **Welcome and introduction**

10:15 **Presentations**

- Received feedback on the purpose and design of training modules
- Lessons learned: "Building blocks" by Pepijn van Willigenburg, The Hague University of Applied Sciences
- Blueprint for 6 GreenTech training modules

11:45 **Discussion**

12:30 **End of the conference**

The ERASMUS+ GREENTECH project aims at breaking down barriers towards a European renewable energy training course.

The GREENTECH project gathers 7 partners from 5 European countries that will build, deploy and test together the mock-up of new training modules, during the next 2 years to come.

This training is specifically adapted to mechanics, technicians, and engineers who will have to work with the new energy mix.

The GREENTECH partners invite you to join this mini-conference in which we will present our ideas on the content of the training modules.

We are looking forward to meeting you on the 19th of January 2023 in Delft, or online via Teams.
