

DEPARTMENT OF SPATIAL PLANNING  
**INSTITUTE OF MANAGEMENT**  
STU

The image shows the exterior of a large, multi-story white building with many windows, identified as the Faculty of Management at STU. The building has a modern architectural style with a flat roof and a series of windows. In front of the building, there is a paved area with a large, dark, abstract sculpture. A tree with green leaves is visible on the right side of the building. The sky is blue. The text 'INSTITUTE OF MANAGEMENT' is overlaid on the right side of the image in a white, bold, sans-serif font. Below it, there are two bullet points in a white, sans-serif font. The background of the text is a dark blue/black gradient.

## INSTITUTE OF MANAGEMENT

- pedagogic, research, and scientific institution of STU.
- is providing research and pedagogic activities in the area of management and spatial planning including landscape planning, land-use planning and strategic socio-economic planning

# STUDYING SPATIAL PLANNING

Study is focused on acquiring the abilities to analyze the state of art, characteristics and values of spatial systems regarding their nature and socio-economic structures, culture, economics, ecology, economic and social dimensions, landscape aesthetics, as well as on forms of utilizing landscape and settlement. Graduates are able to use this knowledge in their own creative planning work. They are able to facilitate the processes of social participation, steer the mediation of conflicts in planning process and coordinate a complex spatial and landscape management.

## Studies consist of three pillars

### **MANAGEMENT**

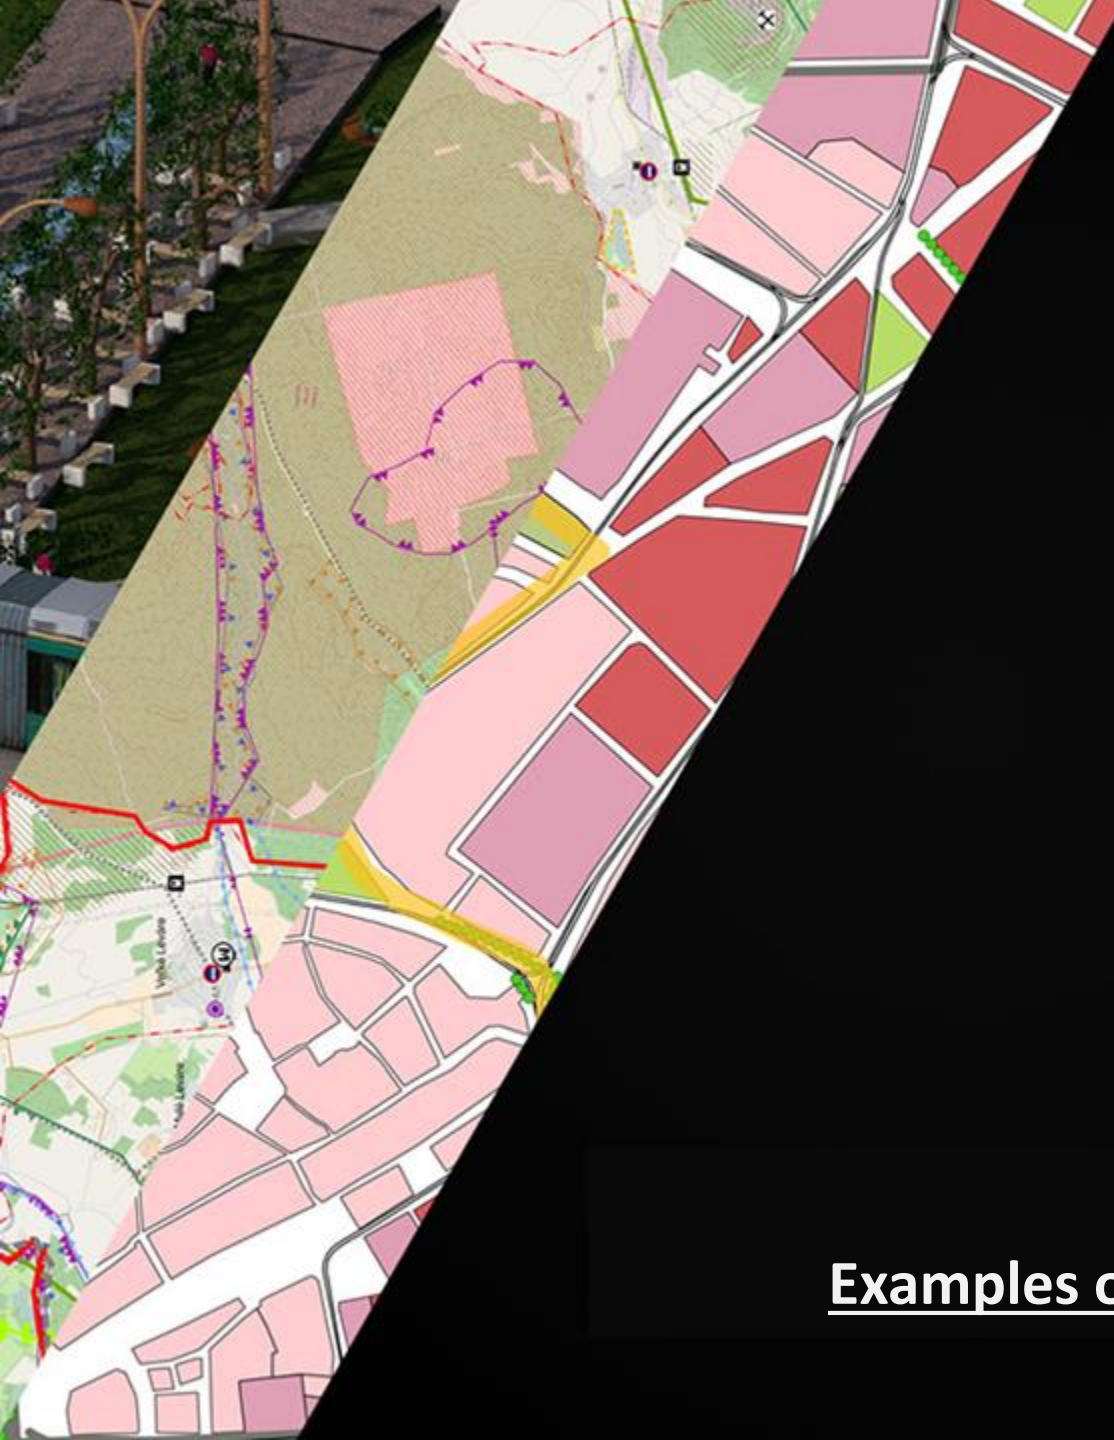

Economy, project management, spatial development management

### **HUMANITIES, NATURAL SCIENCES, TECHNICAL**

Ecology, sociology, law, transportation and technical infrastructure

### **CREATIVE**

Urbanism and urban planning, landscape planning, strategic planning

Examples of student projects

## **Country landscape studio**

Within the studio, students solve the issue of urban greenery within an urban structure in a selected area of parks, gardens or brownfields. In addition to analyzing the current state, identifying problems and proposing solutions, they deepen their knowledge of landscape design, composition, ecology and the impact of greenery on humans.

Mierová ulica Bratislava

Posádkový klub Trenčín

Zelená voda Bratislava

Kuchajda Bratislava

## **City as a personality studio**

Students analyze the city as a unique personality its manifestation in practice. It anchored in sociology and urban semantics, the projects try to understand and present the city as a communicating organism
