

About Us

«A bold Reformer of Expertise and an active Builder of the Future»

Metropolia University of Applied Sciences, Finland's largest university of applied sciences, educates the professionals of tomorrow in the fields of Business, Culture, Health care and Social services, and Technology.

In our community people and worlds meet to create insight, expertise and well-being for both the professional life and life in general. You can count on Metropolia as a reliable partner and an innovator in higher education. Through cooperation we discover new ideas and solutions to build a better future.

Our goal and strategy

Our strategic intent is to be a bold reformer of expertise and an active builder of the future. Our strategic goals are focus, renewal and growth:

- We focus on high-quality learning and professional life cooperation.
- We renew our operating culture and expertise through digitalisation and campus development.
- In terms of research, development and innovation and business solutions, we seek growth especially in impact and external funding.

- Transparency – our operating policy
- Expertise – our passion
- Community spirit – our source of strength

Why Metropolia?

- The educators are certified experts in their fields with a proven academic record
- Long history in teaching in English at Bachelor level
- Evidence-based practices in education
- Compulsory work placement component in all Bachelor Degrees
- Location in the country capital

Electronics, Bachelor's Degree

Studying electronics in a truly multicultural environment in Metropolia UAS gives you a perfect start towards an international career in a challenging and fast developing field of technology. The degree gives you a solid basis to work as an engineer anywhere in the world in various positions. Your studies in the Degree Programme in Electronics include extensive core requirement studies in natural sciences and a diverse range of electronics professional studies. Professional qualifications are supplemented with project management, language and communication and IT studies. You will become familiar with intercultural aspects due to the multi-cultural study environment and student community.

Information Technology, Bachelor's Degree

You will learn the basics in core engineering subjects such as mathematics and physics. Professional studies in Information Technology will fortify your engineering skills in addition to languages and communication skills and business courses that will top-up your competence.

You will be linked to working-life throughout your studies via industry-related projects, work placement periods and a Final Year Project. This gives you a chance to create useful networks and plan your future career whilst studying.

Other courses available for the incoming exchange students in Technology and degree students in Real Estate and Construction.

- Degree Programme in Sustainable Building Engineering,
- Degree Programme in Construction Architecture.
- International Semester in Land Surveying and Urban Planning.

Exchange Studies

Metropolia also welcomes exchange students from our partner universities all over the world. Every year about 400 exchange students enjoy their semester or academic year at Metropolia.

How to apply for Exchange Studies

Once you have found a course you want to study the next step is to apply by following the IUT admission procedure for outgoing mobility. You can refer to your international department coordinator to determine the best option for your studies abroad.

Living expenses

Credit and debit cards are the primary means of payment in Finland. Some establishments do not even accept cash as payment. For basic expenses such as food, rent and transportation, you should count at least 700-1000 € for each month. This could be divided, for example, as follows:

- Rent : 400-700 €
- Food : 250 €
- Transport: 25-80 €
- Leisure: 100 €
